DISCLAIMER: LP1 / LP1N / LP1+ / LP1X link arm assemblies are compatible with XP style shank. LP1 units have been aftermarket retrofitted on frames from nearly all major OEM brands, however, with any retrofit there may be mounting interference on any OEM frame & H-I does not guarantee compatibility. It is up to the customer / dealer to validate individual frame compatibility.

Harvest International offers various stepbacks, support mounts, and adapter plates are available to help facilitate different aftermarket retrofit scenarios.

Compatible with Conceal, mini-hoppers, 1.6bu/3bu Seed boxes, vSet2/mSet, DeltaForce or SureForce, FurrowForce, SpeedTube, or SureSpeed, etc.
Link Arm assemblies are compatible with XP Shanks and are available in green for retrofits.
Standard shank & closing tail; Standard gauge wheel options.
